Experience

Product Manager, Five9

June 2026 – Present

- Product Manager for AI Insights, GenAI Studio, Agent Assist, Knowledge Studio & Transcription Services
- Revamped AI Insights with an entire new design & workflow
- Handled customer feedback sessions and demos
- Handled and resolved customer issues with sales, Technical Account Managers, and Professional Service personnel
- Introduced and in charge of the integration of Claude, OpenClaw, & Hermes Agents into the workflows of Product Engineering and Product Management
- Created different prototypes and features that would be groomed in AI Insights, GenAI Studio, and Knowledge Studio
- Dictate necessary UI components and design teams for each product
- Created an automated dashboard for the Product Management org to handle OKRs and QBR prep

Software Engineer, Five9

June 2025 – June 2026

- Joined the Gen AI Insights team, contributing to the development of scalable infrastructure supporting AI Agent applications for enterprises
- Used RxJava to build non-blocking, event-driven microservices services, reducing model response latency by an average of 10ms per API call and improving throughput under high load
- Redesigned internal monolith architecture, enabling cross-model result retrieval (e.g., GPT, Claude, Gemini, Llama) across different microservices, increasing internal QA team efficiency by 96%
- Developed two APIs, providing functionality to multiple Five9 products, GenAI Insights, AQM (Agent Quality Management), and Agent Assist
- Implemented, deployed, and handled Llama family models to Gen AI Studio and Knowledge Studio
- Worked as an Interim Product Manager for Insights grooming different features, handling customer issues, and developing prototypes for future dashboard features

Machine Learning Engineer, AstroSeed

Aug 2023 – Dec 2024

- Created and refined different AI models to recognize health symptoms in vegetation
- Built a distributed system for image processing, sending images for computation and returning results to display
- Produced an accurate machine learning model using CNNs, capable of identifying different plants and associated symptoms with a 98.57% accuracy, leading the team to a 5x more accurate product than the initial prototype

Education

Arizona State University, B.S. Computer Science

Aug 2020 – May 2024

- **Coursework:** Distributed Systems, Artificial Intelligence, Machine Learning, Quantum Mechanics, Human Computer Interaction (UI/UX), Software Quality Assurance & Testing, Computer Networks, Operating Systems, Compiler Development, Design & Analysis of Algorithms, Probability and Statistics for Engineering, Applications of Linear Algebra

Technical Skills

C++ , C, Java, Scala, Python, Rust, Go, Lua, OCaml, Ruby, Objective-C, C#, SQL, JavaScript, TypeScript, R, React, Lit, PyTorch, MLIR, Docker, Kubernetes, GCP, Datastore, AWS, Azure, Git, OOP, Scala, RxJava, Product Management, Spark, Kafka, Apache, NodeJS
